PROPOSAL

QS Assets — Enterprise IT & Non-IT Asset Management

Registered Address: C-403 Royal Estate Apartment, 7 Laplace Hazratganj, Lucknow
— 226001, Uttar Pradesh, India

Contact: +91 7752981110 | smrita@neurqai.com | contact@qsasset.com |
www.qsasset.com | www.neurqai.com

GSTIN: 09AAKCN7956K1ZL

CIN: U58200UP2025PTC231555 · PAN: AAKCN7956K · TAN: LKNN10569G · UDYAM: UDYAM-
UP-50-0231464 · DIPP: DIPP226572 · StartinUP: R/STARTUP/UP/LKO/2025/000040941

Unique requirement-based pricing. Enterprise and banking deployments are not sold as a flat SaaS list alone. Scope is sized from branches, IT & non-IT assets per site, deployment model (on-premise / hosted by customer / managed SaaS), customization, training, AMC, and optional managed services. The quotation below is an **illustrative covering letter for Bank A** — final commercials are shared after inventory confirmation.

Customer Information		Quote Information	
Name	Bank A	Ref No.	QS-ENT-Q-2026-0914
Location	Madhya Pradesh (M.P.)	Date	14 July 2026
Contact Person	Mr. [To be filled]	Account Manager	Smrita Pandey
Contact Number	[To be filled]	Contact Number	+91 7752981110

Subject: Commercial Proposal for QS Assets — On-Premise Implementation for Bank A (20 Branches · IT & Non-IT Asset Management)

BRANCHES 20 Bank A estate	IT ASSETS / BRANCH 100 2,000 IT assets total
NON-IT ASSETS / BRANCH 50 1,000 non-IT assets total	TOTAL ASSETS 3,000 Licensed Year-1 inventory

Sr. No.	Description			
1	QS Assets — IT Asset License (On-Premise / Hosted by Customer) 1-year · 20 branches × 100 IT assets · discovery, CMDB, monitoring, ITSM	2,000	1,500	30,00,000
Total Amount (excl. GST)				50,00,000
GST @ 18%				9,00,000
Grand Total (incl. GST)				59,00,000

Sr. No.	Description			
2	QS Assets — Non-IT Asset License (On-Premise / Hosted by Customer) 1-year · 20 branches × 50 non-IT assets · facilities / equipment / CCTV inventory	1,000	1,200	12,00,000
3	One-time On-Premise Implementation, Customization & Training Stand-up, branch rollout, configuration, admin/end-user training, Year-1 hypercare	1	8,00,000	8,00,000
Total Amount (excl. GST)				50,00,000
GST @ 18%				9,00,000
Grand Total (incl. GST)				59,00,000

Amount in words: Indian Rupees Fifty-Nine Lakh Only (incl. GST). Illustrative — final unit pricing after estate / BOM confirmation.

Post Year-1 & optional managed services (charged separately)		
Item	Basis	Indicative annual (excl. GST)
AMC / Annual Maintenance (from Year 2)	18% of Year-1 license value (₹42,00,000)	₹7,56,000 / year
Managed Services (optional)	NeurQ-operated monitoring, patch ops, desk assist — if required by Bank	Quoted separately on SOW

Terms and Conditions

- **Taxes:** 18% GST extra on taxable items (included in Grand Total above).
- **Payment Terms:** 100% advance along with PO (or as per signed enterprise order form).
- **Estimated Delivery:** 2–3 weeks for environment readiness from order date; branch rollout per plan.
- **Validity:** Prices valid for 7 working days from the date of this Proposal.
- **Price:** Unique to confirmed branch / asset counts; may change with scope.
- **Cancellation:** Once order is placed, it cannot be cancelled.
- **Freight / travel:** Extra as per actual (if any) for on-site activities.
- **PO & Payment:** In the name of “NeurQ AI Labs Private Limited”.
- **AMC:** Starts after Year-1 annually. Managed services optional & billed separately.

07 Implementation roadmap

01 Executive summary

Distributed estates — endpoints, network gear, facilities equipment, cameras, fleet, and cloud resources — still live in spreadsheets and siloed tools. That creates blind inventory, slow incident triage, software audit risk, and expired contracts that become emergency spend.

QS Assets (product of **NeurQ AI Labs Private Limited**) is a production platform that unifies agent + agentless discovery, a living asset / CMDB record, ITIL-style service desk, monitoring, vulnerability & patch workflows, and non-IT modules (CCTV, fleet, facility) in one control plane. Customers can run **managed SaaS** at www.qsasset.com or **self-host** with Docker and PostgreSQL when residency requires it.

200+

TEAMS

Active customer teams on the platform

50K+

ASSETS

Assets under management worldwide

99.9%

SLA TARGET

Pro & Enterprise managed SaaS uptime

SOC 2

CONTROLS

DPDP Act 2023-oriented practices

Typical enterprise pains

- ✗ **Blind spots:** Manual tracking leaves large shares of network assets unmonitored.
- ✗ **Technician friction:** Tickets lack hardware / patch context, extending MTTR.
- ✗ **License liability:** Weak SAM invites audit exposure and shelfware spend.
- ✗ **Contract oversights:** Expired AMC / warranty triggers emergency repair cost.

QS Assets outcomes

- ✓ **Auto discovery:** Agent + SNMP / SSH / WMI / nmap sweeps keep inventory alive.
- ✓ **ITSM + CMDB:** Incidents open against the same asset record technicians need.
- ✓ **SAM & renewals:** Installation counts and contract alarms before expiry.
- ✓ **Deploy your way:** SaaS today, on-prem / private VPC when policy demands.

02 Platform capabilities

FROM DISCOVERY TO ACTION

01 · DISCOVER

Auto-discovery

Find devices with agents or agentless SNMP, SSH, WMI, and nmap sweeps.

02 · OBSERVE

Live monitoring

CPU, RAM, disk, and network telemetry from agents on a steady cadence.

03 · ALERT

Alert engine

Threshold alerts via email, Slack, webhooks, and in-app notifications.

04 · SECURE

Threat signals

USB monitoring, unexpected port changes, and file integrity detection.

05 · AUTOMATE

Automation rules

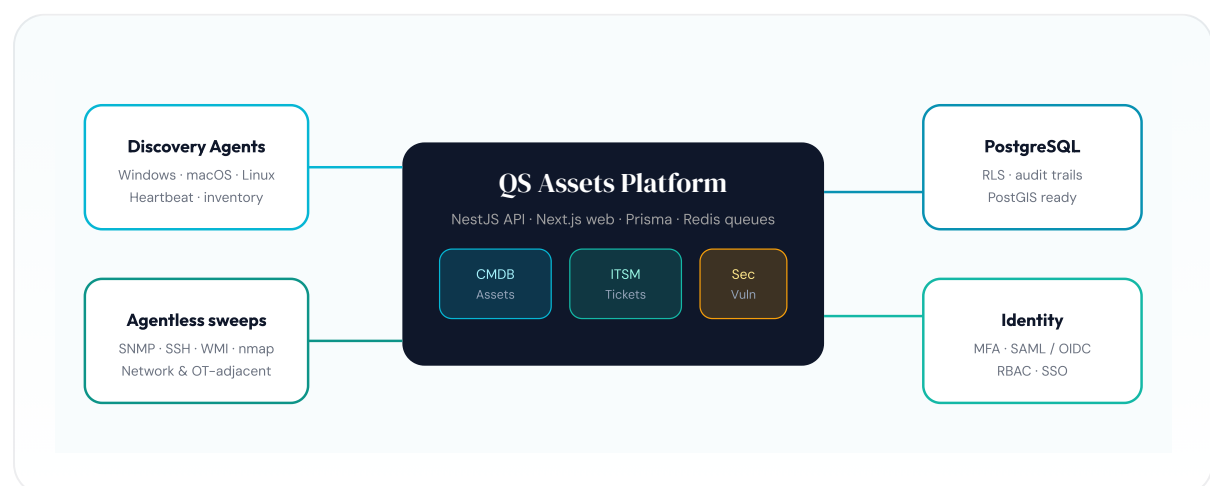

Event-driven rules to notify teams, open tickets, or run approved scripts.

06 · DEPLOY

Flexible hosting

Run as SaaS or self-host with Docker and PostgreSQL on your infrastructure.

Reference architecture

03 Module catalogue

Twelve production modules shipped in the live product — same catalogue as the QS Assets marketing platform.

● IT Asset Management

Lifecycle from procurement to retirement — discovery, depreciation, checkout / attestation.

● Non-IT Asset Management

Facilities, furniture, equipment with QR / barcode tagging and maintenance schedules.

● ITSM Service Desk

Incident, problem, and change with SLA timers, escalation, and end-user portal.

● Vulnerability Scanning

Agent-based and agentless CVE detection, CVSS scoring, remediation tracking.

● Network Monitoring

SNMP polling, bandwidth, topology views, syslog / traps, NetFlow top talkers.

● Patch Management

OS / third-party visibility, compliance scoring, pilot rings and rollback paths.

● CCTV Surveillance

Camera fleet inventory, health monitoring, stream status, zone maintenance.

● Fleet & GPS

Vehicle tracking, trip history, driver assignment where GPS feeds are available.

● VDI Management

Virtual desktop sessions, pool visibility, and resource utilization.

● CMDB & Dependencies

Configuration items, relationship mapping, change impact context.

● Procurement & Contracts

Vendors, POs, renewals, budget tracking, warranty / AMC alerts.

● Reports & Compliance

Dashboards, scheduled reports, audit-friendly activity trails, DPDP alignment.

04 Architecture & security

Stack (as-built)

Web: Next.js (Vercel for SaaS)

API: NestJS on Railway (or customer host)

Data: PostgreSQL / PostGIS + Redis

Agent: Node discovery agent (Win / macOS / Linux)

Packaging: Docker Compose for on-prem

Security posture

TLS in transit · secrets encryption · tenant RBAC

Postgres row-level security · MFA (TOTP) · SSO (SAML / OIDC)

Activity trails · SOC 2 control program

DPDP Act 2023-oriented practices · published DPA & SLA

TRUST CENTER

Full security narrative, subprocessors, and disclosure contacts:

www.qsasset.com/security · [DPA /dpa](#) · [SLA /sla](#) · [Status /status](#)

On-prem sizing (self-host)

Profile	CPU	RAM	Storage	Runtime
Up to ~1,000 assets	2 cores	4 GB	20 GB SSD	Docker Engine 24+ / Compose 2.20+
10,000+ assets	8 cores	16 GB	100 GB SSD	PostgreSQL 15+ · Redis 7+ · Node 20+
Host OS	Ubuntu 22.04 LTS · Rocky Linux 9 · Windows Server 2022 (container host)			

05 Competitive landscape

Illustrative capability comparison — packaging varies by edition and region.

Capability	QS Assets	ManageEngine-class	ServiceNow-class	JSM-class
IT + Non-IT asset management	✓	✓	✓	—
Agent + agentless discovery	✓	✓	Addon / partner	Insight
Built-in ITSM	✓	✓	✓	✓
CCTV / Fleet modules	✓	—	Custom	—
SaaS + true self-host	Both	Both	Cloud-first	Cloud
India DPDP-oriented controls	✓	Varies	Varies	Varies
Typical time-to-value	2–8 weeks	3–6 months	6–12 months	3–5 months
Licensing shape	Plan + assets	Per tech + node	Enterprise FUL	Per agent

06 Commercial offer

Enterprise / bank deployments use unique requirement-based pricing — branches, IT & non-IT assets per site, on-premise vs SaaS, customization, training, Year-2+ AMC, and optional managed services. See the [covering letter quotation](#) (Bank A sample). Public SaaS catalogue below is indicative for self-serve plans only.

PRICING MODEL (ENTERPRISE)

License = $\sum (\text{assets} \times \text{unit rate})$ by IT / non-IT · **One-time** = implementation + customization + training · **GST 18%** on taxable totals · **AMC from Year 2** (typically ~18% of Year-1 license) · **Managed services** quoted separately if required.

Indicative public list pricing on www.qsasset.com/pricing (INR, monthly). Promotional rates shown where currently active.

- ✓ Negotiated pricing
- ✓ Dedicated account manager
- ✓ Priority onboarding

USD list for reference: Professional \$199/mo (promo \$99.50) · Enterprise \$499/mo (promo \$249.50). Starter asset ceiling is enforced at **5 assets / 4 users** in product metering. Professional & Enterprise managed SaaS include a **99.9% monthly uptime** commitment with published service credits — see [SLA](#).

07 Implementation roadmap

Phased rollout designed for controlled cutover. SaaS customers typically compress Phase 1 significantly.

Weeks 1–2 • Foundation

Tenant / environment stand-up (SaaS or Docker). SSO or directory hooks. Role model. Sites & departments. Branding and alert channels.

Weeks 3–5 • Discovery pilot

Credential vault for SNMP / SSH / WMI. Agentless sweep of approved CIDRs. Pilot agent rollout (~50–100 endpoints). Discovery → managed asset approvals.

Weeks 6–8 • Service desk & scale-out

ITSM queues, SLA policies, portal users. Broader agent deployment via GPO / MDM / packaging. Patch & vulnerability workflows enabled.

Weeks 9–12 • Harden & handover

Automation rules, contract / AMC alarms, attestation cycles, report schedules. Admin training, runbooks, go-live checklist, hypercare.

Illustrative ROI (2,500 assets • 20 agent seats)

Annualized model	Traditional tools stack	QS Assets
Estimated annual spend	₹76,08,000	₹20,40,000
Implied savings	≈ ₹55.7L / year at this scale (illustrative; actual TCO depends on edition & scope)	

Model mirrors the public calculator on the QS Assets homepage (asset unit cost + agent overhead). For a customer-specific ROI sheet, contact sales.

08 Next steps

1. Confirm estate size (IT + non-IT assets), hosting preference (SaaS / on-prem), and must-have modules.

2. Book a live demo — discovery sweep + ticket↔asset walkthrough on a sandboxed estate.
3. Start a Starter workspace free at www.qsasset.com/register, or request an Enterprise order form.
4. Security questionnaire pack: Trust Center, DPA, SLA, and subprocessors list.

Ready to inventory your *estate*?
